## **ECFiber and the Town of Chelsea**

Chelsea is a member of the East Central Vermont Telecommunications District, a Vermont municipality whose mission is to provide internet service to homes and businesses in its area. During the past year ECFiber added almost 1,700 new customers and now serves over 7,000 premises in 23 towns via 1,500 miles of fiber-optic cable. The district consists of 31 member towns, which, when fully built out, will bring fiber-to-the-premises (FTTP) to about 31,500 locations over more than 2,000 miles network.

In Chelsea, ECFiber has only recently completed construction of its network. As of November, 2021, there were 121 customers along 70 miles of network.

ECFiber is funded entirely by customer revenues, which in turn back tax-free municipal bonds issued by the district to raise capital to build our infrastructure. This model is now the state's strategy for solving the rural broadband crisis and eight CUDs like ECFiber are working hard to get going. The once-in-a-lifetime ARPA funds the state received for broadband have been put into the Vermont Community Broadband Fund. ECFiber and ValleyNet leadership were deeply involved in the work of the administration and legislature during the last session and continues to engage with the state and other CUDs in pursuit of the statewide goal of bringing fiber to all homes and businesses on the grid in our state. We invite you to visit our website to learn more about ECFiber, and encourage you to subscribe. You won't be charged anything until we start service.

Jonathan Maier, Chelsea's delegate to the ECFiber Governing Board
